

A central graphic with a teal and blue color scheme. The words "DATA MIGRATION" are prominently displayed in the center. Surrounding this text are several circular icons: gears, a funnel with numbers, a server rack, a cloud with arrows, a document with binary code, and a checkmark. The background shows a person's hands holding a device.

DATA MIGRATION

Introduction of Strategic Migration Toolkit (SMT)

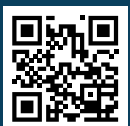

Companies often face pressure to split the complex data models based on multiple business criteria in a short timeframe. Additionally, evolving regulatory guidelines makes it difficult to assure a holistic application of the regulation for an IT manager. Based on such challenges, our field experience, and the inputs of M&A experts, Strategic Migration Toolkit was developed to facilitate the process more efficiently and expeditiously. The tool highlights our deep understanding of complex archived (SAP) data models and how to selectively & flexibly accomplish the following two primary objectives:

- Mergers & Acquisitions
- Selective deletion of personal data (for regulatory compliance)

Splitting of binary (archived) data and document based on flexible rules is simplified by the toolkit. The tool can be complemented with any online data carve out tool to provide a holistic migration/deletion of the desired data or documents.

Why Choose Us
